

# LUCERNE

Take the top 20 cm of the plant.

Take at least **80 tops**, randomly across the sampling area to obtain a representative sample.

If plant height is below 30 cm, please send **120 whole plants**, without the roots.

If you require a Sap 4 comprehensive analysis please collect **two times** as many tops/plants.

## Monitoring program

Begin sampling at budding monitor fortnightly to monthly to mid-harvest.

## Additional Notes:

- To ensure that the laboratory is able to perform the entire test suite required and that the optimal levels supplied on the laboratory report are relevant, please ensure that the above instructions are followed.
- Place samples into a plastic sample bag, not in paper, as paper will dry out the sample and may not allow for enough sap to be extracted for the analysis requested.

# LUCERNE

**New Vs Old Leaf testing is not available for this crop.**
