

RICE

Take the first fully expanded leaf. The part to be tested is the midrib of the leaves.

Send **200 - 300 leaves** from across the sampling area.

If you require a Sap 4 comprehensive analysis please collect **twice** as many tops.

Monitoring program

Sample monthly during growing season.

RICE

DIFFERENTIAL SAP ANALYSIS

Take the first fully expanded leaf. The part to be tested is the midrib of the leaves. This will become your NEW LEAF SAMPLE.

Take a fully expanded leaf from an old part of the plant. The part to be tested is the midrib of the leaves. This will become your OLD LEAF SAMPLE.

Monitoring program

Sample monthly during growing season.

NEW LEAF

(1ST FULLY
EXPLAINED LEAF)
